Columbia® LTS-PD Pallet Exchanger

Load Transfer Stations are capable of transferring products that are packaged in cases, barrels, drums, bags and pails from one pallet to another including Plastic, Chep and GMA pallets in both receiving and shipping applications. The Load Transfer Station with Pallet Dispenser (LTS-PD) is made up of a standard LTS, pallet cart and side load pallet dispenser. The forklift driver loads a stack of pallets into the pallet dispenser. The pallet dispenser automatically places the “go to” pallet onto the pallet cart. Then the forklift driver places the load to be transferred onto the receiving deck and activates the unit by pulling the cord, allowing the cycle to complete in less than 60 seconds.
